

Tommy Cleaning Products #9 and #10 Setup Instructions

Overview: The Tommy's detergents team is excited to announce the rebranding and new launch of our Tommy's Express #9 and #10 cleaning products. These products will be the new Tommy's Express standard moving forward and will be an easy, seamless transition to improve your cleaning practices in the Tommy's tunnel.

Tommy's Express #9B: [Click here for Technical Data Sheet](#)

- This product, formerly known as our Tommy's EWF cleaner, is now our new franchise standard for Tommy's Express #9, a one stop shot for cleaning cloth, floor, and windows.
- **Setup Instructions**
 1. Purchase Tommy's Express #9B, available on our Tommy's store, conveniently available in easy chem containers under part number C-9-EZ-B.
 2. Use the rest of your current inventory of the old Tommy's Express Cloth & Window cleaner. Once depleted, thoroughly clean and rinse out the Tommy's Express #9 tote underneath the maintenance pod with water before refilling the tote with our new Tommy's Express #9B product, C-9-EZ-B
 3. Cut a new draw line and install a new foot valve and weight for your Tommy's Express #9 tote, ensuring the foot valve reaches the bottom of the container
 4. Ensure that the Tommy's Express #9B product is properly plumbed to your dry hugger cleaning function, and that it is also properly plumbed to the "Windows" switch on the maintenance pod.
 5. Dial in the usage and dilution for your new Tommy's Express #9B product in the maintenance pod. Install either a 2.25 or 3.25 injector with a grey Hydraflex metering tip based on preference, targeting between a 1:7-10 dilution ratio for everyday bay gun cleaning.
 6. For heavy duty cleaning, you may self-dilute as strong as 1:2 (50% water and 50% Tommy's Express #9B) using a foam cannon attachment on your bay gun for increased cleaning power, like this one [here](#).
 7. Ensure the new Tommy's Express #9B product is filled into the Tommy's Express #9 tote and hook up the new draw line to the injector. Test the "Windows" switch on the maintenance pod and the "Dry Hugger Cleaner" function to ensure the product is properly drawing from the container.
 8. Follow the instructions on the Technical Data sheet for Tommy's best cleaning practices

Tommy's Express #10B: [Click Here for Technical Data Sheet](#)

- Tommy's Express #10B is a new and improved product and our new franchise standard for Tommy's Express #10, a one stop shop for cleaning the interior of your building, concrete, equipment, and walls.
- **Setup Instructions**
 1. Purchase Tommy's Express #10B, available on our Tommy's store, conveniently available in easy chem containers under part number C-T-Walls-EZ-B.
 2. Use the rest of your current inventory of the old Tommy's Express Bay Cleaner or Tommy Brite. Once depleted, thoroughly clean and rinse out the Tommy's Express #10 tote underneath the maintenance pod with water before refilling the tote with our new Tommy's Express #10B product, C-T-Walls-EZ-B
 3. Cut a new draw line and install a new foot valve and weight for your Tommy's Express #10 tote, ensuring the foot valve reaches the bottom of the container
 4. Ensure that the Tommy's Express #10B product is properly plumbed to your "Walls" switch on the maintenance pod.
 5. Dial in the usage and dilution for your new Tommy's Express #10B product in the maintenance pod. Install a 3.25 injector with a grey Hydraflex metering tip, targeting a 1:10 dilution ratio for everyday bay gun cleaning.
 6. For heavy duty cleaning, you may self-dilute as strong as 1:2 (50% water and 50% Tommy's Express #10B) using a foam cannon attachment on your bay gun for increased cleaning power, like this one [here](#).
 7. Ensure the new Tommy's Express #10B product is filled into the Tommy's Express #10 tote and hook up the new draw line to the injector. Test the "Walls" switch on the maintenance pod to ensure the product is properly drawing from the container.
 8. Follow the instructions on the Technical Data sheet for Tommy's best cleaning practices
 9. For additional questions or concerns, you may reach out to your FBC, the Tommy's detergent team at detergents@tommycarwash.com, or the Tommy's Equipment Support team.
